SUMMARY

With my comprehensive 4+ years of experience in web development and a strong background in both front-end and back-end technologies, I am confident in my ability to contribute effectively to your team and deliver exceptional results.

I have a proven track record of designing and developing robust and scalable web applications using PHP/React & Nextjs for the back end and React.js for the front end, ensuring seamless integration of user interfaces with back-end logic.

My experience also includes implementing RESTful APIs, integrating with databases (SQL, appwrite or SANITY), and conducting thorough testing, debugging, and performance optimization to ensure the reliability and security of applications. I am committed to writing clean, efficient, and maintainable code following best practices and coding standards. Furthermore, I stay updated on emerging technologies and industry trends, proactively recommending innovative solutions to enhance products and processes. I am dedicated to continuous learning and professional development for innovation and excellence.

I am particularly focused on keeping clients at the center of everything and working hard to understand their deepest needs and focus on their long-term success.

I look forward to the opportunity to discuss how my skills and experience align with your company needs.
